

About TrustMotion

TrustMotion (former TTTech Auto), part of NXP, is a leading software platform product and service provider with a focus on System, Safety, and Security for the Software-Defined Vehicle (4SDV). With series production experience from millions of vehicles and a strong technology portfolio, TrustMotion enables customers to accelerate SDV development while optimizing system performance, safety, integration, and software updates. As a neutral automotive supplier, TrustMotion operates within an open industry ecosystem, supporting all OEMs, Tier-1s, different chip manufacturers, as well as third-party software partners and provides full confidentiality and data protection.
